

Anglian Water Green Bond

Featured Project

COTTON VALLEY STC

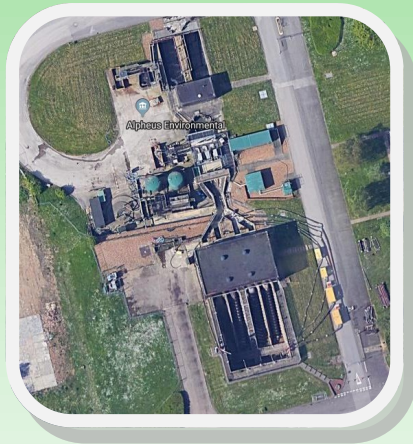

Total project spend £5,566K

Total carbon saving 2%

Increasing capacity means increased levels of gas production

Using natural resources (sludge) more efficiently to create renewable energy

This project will help manage the waste throughout the life cycle and ensure that maximising the benefit of this 'waste' is achieved

ADDITIONAL USED WATER TREATED
2,869 M3/day

TOTAL PROJECT SPEND
£7.5m
TOTAL CAPITAL CARBON SAVINGS
45%
POPULATION GROWTH
17k (8%)
